

SUMMARY

I bring diverse experience in virtual automation, game development, and related technical fields, with hands-on expertise in designing, developing, and maintaining interactive applications using modern game engines and real-time 3D technologies. I have a proven track record of collaborating within interdisciplinary teams to deliver innovative solutions for the automotive industry. I am strongly committed to the development of high-quality, immersive experiences and to the continuous advancement of simulation, visualization, and virtual reality technologies.

SKILLS

- Unity 3D
- C#
- C++
- Unit Testing
- Python
- Arduino
- Raspberry Pi
- Api testing
- Autodesk Maya
- Adobe Photoshop
- Google Firebase
- Blender
- Program Management
- MS Word, Excel
- PowerPoint
- Git
- Problem Solving
- Creativity
- Collaboration
- Team Management
- Public Speaking
- Self-Motivation
- Java
- 3Ds Max

LANGUAGES

- English | Advanced
- German | Intermediate
- Punjabi | Native

EXPERIENCE

Working Student in VR Development Jan 2026 — Present
Mercedes Benz — Sindelfingen, Germany

- VR Development Working Student:** Contributed to the development of immersive virtual reality solutions for automotive applications at Mercedes-Benz.
- Unity Application Maintenance:** Maintained and enhanced VR applications developed in Unity, including internally developed packages and tools.
- Visualization & Simulation Support:** Supported visualization, simulation, and testing workflows through the use of virtual environments.
- Cross-functional Collaboration:** Collaborated closely with engineers and developers to debug issues and implement new features within existing applications.

Master Thesis in Photorealistic Data Generation from the Digital Twin for AI-Based Visual Quality Inspection May 2025 — Nov 2025
Mercedes Benz — Stuttgart Germany

- CAD-Based Digital Twin Integration:** Using CAD models to create a digital twin for simulating Robots using real world data.
- Synthetic Data Generation:** Generating High-quality images using Unity to train AI for visual inspection, exporting the result in ONNX format.
- Digital Twin Testing:** Testing trained AI within a digital twin environment to validate performance.
- Cross-Platform Deployment:** Deploying the final AI model as a standalone executable for Windows , Linux using Unity.

Internship in the field of Unity/VR/AR in the Digitalization department Sep 2024 — Mar 2025
Mercedes Benz — Stuttgart Germany

- VR Experience Development:** Developed interactive VR experiences for virtual simulation of new factory workers.
- Programming Expertise:** Utilized C# programming and game development expertise to optimize performance and enhance user experience.
- VR Integration:** Integrated VR headsets and controllers to create realistic simulations for training purposes.
- Application Design:** Designed and implemented applications for WebGL and Windows platforms.

Unity Game Developer Jul 2021 — Jan 2024
High on Tech

- Language Mastery :** Proficient in C#, C, Java and Python.
- Global Client Handling :** Experience with international clientele.
- Complex Problem Solver :** Skilled in tackling intricate game development issues.
- Diverse Application Development :** Expertise in 3D apps, AR/VR, and 2D games.
- Game Development :** Specialized in gameplay, AI, and optimization.
- Unity Tool Proficiency :** Utilized Asset Store, Asset Bundles, Animator, etc.
- Tech Trend Awareness :** Keen on staying updated with Unity's latest advancements.

Lab Engineer Jun 2020 — Jul 2021
University of Management and Technology

- Multifaceted Instruction :** Teaching C, Python, SQL databases, and C# subjects.
- Lab Support & Guidance :** Assisting students through interactive coding labs.
- Personalized Feedback :** Providing tailored feedback to enhance coding skills.
- Effective Communication :** Clarifying complex tech concepts through clear.
- Teaching:** Experienced Training in Computer Science subjects in University with up to 50 students Per Session

Unity 3D Instructor Feb 2018 — Mar 2020
GameTrain

- Engaging Trainer & Motivator :** Known for motivating students to excel.
- Unity 3D Expertise :** Proficient in crafting mobile and web games in 2D/3D.
- Project Management :** Led team in 3D game creation from concept to final product.
- Mentorship:** Provided Guidance to CS graduates in Game development and industry placements

EDUCATION

Master of Science in Automotive Software Engineering Mar 2023 — Present
Technische Universität Chemnitz — Chemnitz, Germany

Bachelor of Science in Software Engineering Oct 2015 — Nov 2019
University of Management and Technology — Lahore, Pakistan

PROJECTS

- DiFa Player** An internal Mercedes Benz VR application for WebGL and Windows PC which allowed new workers to know more about Production Machines and their various parts.
- HN-Metaverse** Optimized, Managed and new features for Happy Nation (Germany), as their platform for users to Join a vast Interactive Open World and earn benefits.
- Warside** FPS Multiplayer Game with Battle Royale Mode.
- Ludo Online** Multiplayer Board Game with Matchmaking and Custom .
- TankRift** Story Based Tank Fighting Game Developed for Android and IOS.
- ShiftPerspective** 2D platformer puzzle game with unique idea and gameplay with light and dark perspectives.
- AR Computer Architecture** Developed AR app for University Students to Understand and observe about computers and its internal Hardware with tutorials.

CERTIFICATIONS & COURSES

- Full Stack Web Developer Course**, Skylite Institute Pakistan
- Unity 3D Developer Course**, CETA UMT, Pakistan
- Adobe Photoshop Course**, CETA UMT, Pakistan
- Rector's Award** for Academic Excellence, UMT Pakistan
- Academic IELTS** overall band score 7.5 (C1), listening:7.5 reading:8.5 writing:6.5 speaking:7.5
